

Shivam Kumar Jha

Full Stack Developer | Java · Spring Boot · React.js · REST APIs · MySQL

Noida, Uttar Pradesh, India | +91 6204410431 | shivamjha8077@gmail.com | linkedin.com/in/shivamjha123 | github.com/Shivam62041

SUMMARY

Full Stack Developer (Java, Spring Boot, React.js) who builds secure, tested REST APIs and React front ends connected through Axios, with JWT authentication and Role-Based Access Control (RBAC). Experienced with Hibernate/JPA, MySQL, JUnit 5/Mockito, Swagger/OpenAPI, Docker, and GitHub Actions CI/CD across 4 projects, including an AI-powered e-commerce platform. MCA (AI & ML), Aug 2026. Skilled in OOP, Data Structures & Algorithms (DSA), and Agile/Scrum.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, RESTful API Design, DTOs & Bean Validation, JWT Authentication, OAuth, Role-Based Access Control (RBAC), Microservices (fundamentals), Node.js, Express.js, Maven

Frontend: React.js, Context API, Axios, React Router, Recharts, Bootstrap, Tailwind CSS, Responsive/Mobile-First Design

Databases: MySQL, PostgreSQL, MongoDB, Firebase Realtime Database

Testing, DevOps & Tools: JUnit 5, Mockito, Postman, Swagger/OpenAPI, Git, GitHub, GitHub Actions (CI/CD), Docker, IntelliJ IDEA, VS Code, Vercel, Firebase, AWS (basics), Spring AI

Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), MVC, CRUD, DBMS, Agile/Scrum

EXPERIENCE

Java Developer Intern | CodSoft | Remote

Jun 2025 – Jul 2025

- Delivered 3 Java applications, all approved in mentor code review, by applying OOP, exception handling, file I/O, and modular design with Git/GitHub version control.

Software Development Intern (Java & DSA) | HitBullseye

Jun 2025 – Jul 2025

- Improved timed problem-solving speed by 40% by solving 50+ DSA problems (arrays, stacks, recursion) in a 4-week proctored curriculum.

PROJECTS

ShopVerse – AI-Powered E-Commerce Platform

Jan 2026 – May 2026

Java, Spring Boot, React.js, Context API, Axios, Firebase, JWT, Docker, Swagger/OpenAPI

- Delivered a full-stack e-commerce platform with a 100+ product catalog by building a React front end (Context API for auth and cart state) that calls Spring Boot REST APIs through an Axios service layer with Firebase Authentication and JWT-secured requests.
- Increased simulated click-through engagement by 35% by building a recommendation engine that personalizes product results for each user.
- Achieved sub-200 ms page navigation while keeping inventory, cart, and checkout in sync in real time by using Firebase Realtime Database listeners with Context API state updates.
- Improved maintainability and onboarding by validating request payloads with DTOs, documenting endpoints in Swagger/OpenAPI, and containerizing the Spring Boot service with Docker.

Energy Analysis & Forecasting

Aug 2025 – Dec 2025

Python, ARIMA, Pandas, Power BI

- Reached 87% forecast accuracy on 50,000+ records by building Linear Regression and ARIMA models in Python and Pandas, and shared results through 3 Power BI dashboards.

e-Learning Platform

Jan 2025 – Jun 2025

React.js, Axios, Spring Boot, Hibernate/JPA, MySQL, JWT, RBAC, JUnit 5, Mockito, GitHub Actions

- Secured 12+ REST endpoints with zero unauthorized access in QA by implementing JWT authentication and RBAC for student and instructor roles in Spring Boot.
- Kept average API response under 150 ms by using DTOs with Bean Validation for request payloads and Hibernate/JPA repositories for MySQL access.
- Delivered 8+ user flows (course CRUD, quiz submission, progress tracking) across dual-role dashboards by building React components with an Axios interceptor that attaches the JWT and role-based protected routes.
- Improved release confidence by writing JUnit 5 and Mockito unit tests for the service layer, testing endpoints in Postman, and running build and test checks in a GitHub Actions CI pipeline.

Health Tracker Web App

Aug 2024 – Dec 2024

Spring Boot, Hibernate/JPA, MySQL, React.js, Axios, Recharts

- Enabled daily logging of 10+ metric types (steps, calories, sleep) by designing a normalized MySQL schema with JPA entities and REST endpoints consumed by React through Axios.
- Delivered 7-day and 30-day trend views by feeding aggregated API responses into Recharts components, with payload validation on both client and server.

EDUCATION

Master of Computer Applications (MCA), AI & ML | Uttarakhand University, Dehradun | CGPA: 7.27/10

Aug 2024 – Aug 2026

Bachelor of Computer Applications (BCA) | BNMU | 88.4%

Jul 2021 – Jun 2024

CERTIFICATIONS

GenAI-Powered Data Analytics Job Simulation | Tata (Forage)

Sep 2025

Data Analytics Job Simulation | Deloitte (Forage)
